CuisineXperience - User Story:

-Visitor

- As a visitor I want to see the Login page

- As a visitor I want to see a button that asks, "are you new here? Come and join our conversations about food!"

- when I click on the "Home" button I can see a main landing page of user posts about their food experiences.

- As a visitor I expect if I click on or touch one of the profile tiles it will take me to the login page where I can register for a new account.

-User

- As a user I want to immediately go to the main page from login in.

- As a user I want to see my food groups and friends list

- As a user I want to see my news feed that I've tailored to my specifications

- As a user I want to be able to see a full profile by clicking on or touching the user profile tab or tile (mobile)

- As a user I want to be able to edit my profile by using the available, marked button.

- As a user I want to be able to add others to my friend's or food groups (user created) list

- As a user I want to be able to block to remove friends.

- As a user I want to be able to share my posts across other social media platforms

- As a user I want to be able search for posts from other users.

- As a user I want to be able to like posts from other users

- As a user I want to be able to comment on other users post

- As I user I want to receive an email when I get a new friend request

- As a user I want to be able to remove comments from my posts, that are offensive or violate comment policy.

-Administrator

- As an administrator I want to be able to delete accounts

- As an administrator I want to be able to delete pictures

- As an administrator I want to be able to view profiles, for any reason.

CuisineXperience features:

1. **User Profiles** - (including new user registration) with a featured image/avatar.
2. **User Profile feed** - this should display users post.
3. **Image Galleries** - to allow users to show off their photos.
